

Thank you for choosing idbasolutions.  
idbasolutions.com

1) First follow steps in documents Database And System Requirements at <http://www.idbasolutions.com/en/support.html>  
Unless you are running the demo or light version, failure to execute all steps outlined in **Database Requirements** will cause idbasolutions startup to fail.

2) If you don't have yet idbasolInstall.exe then do this step:  
From idbasolutions.com, download idbasolInstall.zip (115MB) into c: drive, download can take up to 10 to 25 minutes or more depending on your internet connection.

Then do as follow:

unzip **idbasolInstall.zip**

→ To unzip right click on idbasolInstall.zip choose Extract All or Unzip or Send to Compressed. This should extract a single file: idbasolInstall.exe

Then double click on.

**idbasolInstall.exe**

Installation time: Around 5 minutes

3) Run idbasolutions using database user idbasol or a similar database account as outlined in document Database Requirements (<http://www.idbasolutions.com/joomdocs/DatabaseAndSystemRequirements.pdf>).

Please note that idbasolutions currently only runs from c:\ and only been tested on Windows platform (XP and Windows 7).

Installing it in any other location but c:\ would not work.

**Uninstall:**

Run idbasolInstall.exe and choose remove.

un-install time: Around 8 minutes
